STILL LIFE ARTWORK

In May of 2019, local Black Hills artist Bill Feterl of Lead, South Dakota came to the City of Deadwood's archaeological lab to sketch some of the objects unearthed during the various archaeological investigations in Deadwood. His goal was to develop several watercolor, still life paintings telling the story of Deadwood.

Still life artwork primarily consists of inanimate subject matter and includes commonplace objects either natural or man-made. Feterl worked with City staff to select objects from the City's archaeological collections representing the best of Deadwood's early western history.

Feterl's first watercolor painting titled "Lost & Found I" features an earthenware container, a leather hobnailed boot from the 1996 Broadway Alley archaeological investigation, three alcoholic beverage bottles from the 2009 Deadwood Recreational Center pool expansion, a felt miners hat from 2001 Chinatown excavation and the 1860 Colt Army revolver found during the 2002 Chinatown excavation.

Feterl's second work titled "Lost & Found II" features several of the same bottles with the addition of an enameled tea pot and stoneware crock jug unearthed during the Chinatown excavation.

Bill Feterl

Feterl's artwork will be on exhibit at the upcoming show at the Dahl Art Center in Rapid City (<https://www.thedahl.org/upcoming-events.html>). The show will feature over 30 watercolor artists and nearly 60 works of art. Northern Plains Watercolor Society promotes interest, education, and appreciation for watercolor painting throughout our expansive region. The group is currently made up of over 100 members whose skills range from professional to hobbyist.

Feterl's watercolor paintings will be on exhibit at the Dahl gallery from August 30 to October 30, 2019.

Outlaw Square Construction Update

If you have been by the site lately you can see things are starting to progress upward—as in framework of the stage. The mechanical, electrical and plumbing rough in work continues inside the building in preparation for ceiling framing and drywall installation.

Prep work continues for the concrete slab placement under the ice rink next week. After the subgrade is fine graded, tent anchors, electrical boxes and rebar will be set as crews are ready to pour.

The timber framing work is taking place on the stage roof structure along with the last pieces of steel from vertical erection. The brick masonry installation continues on the east wall of the building. Domestic water service tie-ins have begun along with the roof storm drain installation and the gas service tie-in and installation of service to the main building has begun.

All of this work continued through the Sturgis Rally and despite the 8.87” of rain that fell on the site during July (yes, you read that right, over 8” of rain in July). Hats off to the crews for giving it their best in helping us reach our completion date in the Fall of 2019!
