Thank you for helping preserve and maintain Deadwood’s historic integrity!

## PEDESTRIAN SAFETY

Many children walk to and from school, and it’s crucial that they understand that safety practices for walking are just as important as those for riding on a school bus or in a car.

Unintentional pedestrian injuries are the second leading cause of death in the United States for children ages 5 to 14, according to data presented on [www.safekids.org](http://www.safekids.org).

To prevent pedestrian injuries, children can follow some simple guidelines:

- Always cross streets at corners where there are traffic signals and designated crosswalks.
- Make eye contact with drivers before crossing in front of them.
- Always walk on sidewalks. If there are no sidewalks, walk facing traffic.
- Always look left, right, and left again before crossing the street.
- Be aware of cars that are turning or backing up.
- Never run out into the street or cross between parked cars.
- Wear retroreflective materials to make sure that you can be seen.
